Serbian Automotive Cluster

Igor Vijatov, Cluster Manager

Majke Jevrosime 9, 11 000 Belgrade, Serbia

P. +381 62 400 086

office@acserbia.org.rs

www.acserbia.org.rs

Serbian Automotive Cluster - AC Serbia network includes Serbian companies and institutions that are producing automotive parts and components, respectively providing services in the automotive sector.

Mission

Connecting business and networking of scientific, development and public institutions that will help in creating synergies and launching joint development projects, in reaching the level of quality and creating a recognizable brand. This will also contribute to international competitiveness strengthening members of AC Serbia.

Vision

AC Serbia is acting as the central network of automotive parts and components manufacturers in Serbia, who have become part of international supplier chains.

Strategic Goals

The network of Serbian Automotive Cluster aims at providing support in strengthening the competitiveness of its members, achieving a profitable positioning within the supplier value chain of international car producers, and effecting indirectly the enhancement of the economic situation within the whole automotive supplier sector.

RAS

Development Agency of Serbia (RAS)

Kneza Milosa 12, 11 000 Belgrade, Serbia

P. +381 11 3398 550

office@ras.gov.rs

www.ras.gov.rs

Development Agency of Serbia (RAS) is a government organization offering a wide range of services including support to direct investments, competitiveness and export promotion, leading the implementation of projects aiming to improve Serbia's attractiveness and reputation and increase economic and regional development.

With a unique set of support programs tailored for micro, small and medium enterprises and entrepreneurs, as well as domestic and foreign investors seeking to set up or expand their business in Serbia, RAS strives to raise Serbia's position in the region and globally.

Created as a one-stop-shop, RAS acts as a reliable partner for both domestic and international companies with a single goal of building a strong and sustainable economy, and increasing the quality of life for the people in Serbia.

EEN - Helping companies innovate and grow internationally

The Enterprise Europe Network (EEN Network) is a network of business support organizations for small and medium sized enterprises, founded and co-financed by the European Union through EU Competitiveness Program for SMEs COSME.

The Enterprise Europe Network helps businesses innovate and grow on an international scale. It is the world's largest support network for small and medium-sized enterprises (SMEs) with international ambitions.

The Network is active in more than 60 countries worldwide. It brings together 3,000 experts from more than 600 member organizations—all-renowned for their excellence and business support.

The members of the consortium for the realization of the Serbia EEN project and support of SMEs in Serbia are:

- Chamber of Commerce and Industry Serbia—Project coordinator
- Development Agency of Serbia
- University of Belgrade
- Mihailo Pupin Institute
- University of Novi Sad
- University Nis

Services of EEN

The EEN network provides a set of standardized services for SMEs sector:

- Internationalization of business: linking businesses across databases business cooperation, participation in B2B meetings and business missions, information about doing business abroad and education related to internationalization;
- Support in accessing funding through training and information, and support for access to programs and EU funds;
- Collecting views of SMEs in relation to regulations and policies of the EU;
- Improving SME innovation capacity;
- Technology transfer.

The EEN manages Europe's largest online database of business opportunities. It contains thousands of business, technology and research cooperation requests and offers from companies and research and development institutions. The database is accessible for free.

BG-BCons offers a wide range of consulting services focusing on EDI, ERP and process consulting. As the channel partner for SEE region (focusing on Balkans, including Romania and Bulgaria) in the name of the company QAD, globally renowned ERP provider, we analyze business processes and implement the newest QAD Adaptive UX-solution for our customers. In addition, we service existing legacy QAD/MFG-Pro-versions.

As a secondary branch, we have developed our own EDI-platform called EDX, that can support our customers from all industries to receive/send and process customer/supplier demand, as well as create delivery notes (paper & EDI), labels and invoices.

Furthermore, we provide support in wide variety of EDI brokerage platforms as Seeburger, DINET, GXS, Sterling etc.

Since 2021 we have extended EDX to be able to cover the legal requirements of the Ministry of Finance of the Republic of Serbia and to translate and transmit eInvoices sent between trading partners and that are copied to the tax-authorities in the required XML-format.

FOUNDED IN	2012

FIELDS OF APPLICATION

SurTec Offers a Complete Portfolio

Industrial Parts Cleaning

- Precision Cleaning
- Interoperational Cleaning
- Surfactant Blends
- Temporary Corrosion Protection

Metal Pre-treatment

- Chromate Replacements
- Phosphate Replacements
- Low Temperature Phosphates
- Hot Dip Galvanizing

Functional Electroplating

- Zinc and Zinc Alloys
- Passivations and Sealers
- Wear Resistant Layers
- Pre-treatment

Decorative Electroplating

- Copper, Nickel and Chromium
- Plating on Plastics
- Tin and Tin Alloys
- Pre-treatment

Company SurTec produces all kind of industrial cleaners, products for phosphating, galvanic coatings (Zn, Zn-Ni, Cr III-new technologies) and products for metal pre-treatment before painting.

In the last one and a half year, SurTec has been producing products for anodizing, thus completing the range of its products.

Current production amounts to over 1500 tons/year.

PROGRAMMES:

- Development & Engineering Services Prototyping;
- Fiber and MLS (multi-layer steel) gaskets for the aftermarket;
- Aluminium gaskets for the electric vehicles;
- Steel components (stamped parts) – car chassis/body components.

KEY PROCESSES:

- analysis of each new product we introduce to our production process;
- working on technical details with our customers;
- tools construction in the house;
- overlooking the tool production with the toolmakers;
- making the first parts out of the tools;
- metal forming in large and medium-sized presses;
- welding the stamped parts together;
- machining of welded parts;
- surface protection of finished parts – outsourced for now;
- mass production.

TRIGO delivers comprehensive solutions to address individual quality challenges through a holistic approach.

TRIGO offers expertise in inspection (wrong delivery management, transport damage containment, CS1, CS2, etc.), firewall, rework, functional tests, and quality-related logistic support.

TRIGO teams, available 24/7, resolve ad-hoc problems in time, liaise successfully on the host-supplier interface, and initiate process improvements for sustainable development. TRIGO with its service deliveries helps customers focus on their core activity and maintain a more cost-efficient operation.

3D Republika is an absolute leader in region and a source of knowledge for additive manufacturing. 3D Republika helps its customers to detect niches in the production process which can be improved by additive manufacturing application and offers a solution in the form of selling and implementing adequate 3D printer, or offers printing services, depending on customer's needs.

3D printed parts can be part of every stage of the product lifecycle from research and industrial prototyping, molds and tooling to manufacturing (mass, short-runs, one-offs) and repairs.

We offer solutions in metal, resin, and plastic printing of large capacity. We also offer services in 3D scanning. Our services have been used by companies such as Continental, Adient, Veritas, Kromberg & Schubert, Yazaki, Henkel etc.
