2 FOREST BASED INDUSTRY AT A GLANCE
Serbia has the potential to become the preferred country for foreign investments in the wood and furniture sector. The wood processing and furniture industry comprises 2,182 companies employing 22,965 workers. More than 90% of enterprises are privately owned and mainly located in the central areas of Serbia. The majority of these companies deal in timber (1,504), while the rest are engaged in furniture production (678). The sector’s share in Serbia’s GDP is 1.4%, while the wood processing industry’s contribution to total export amounts to 5.7%, with an ongoing positive growth trend over the last few years.

Serbia’s extensive experience has fostered a number of highly skilled, qualified workers who make this industry highly competitive. The average gross monthly salary is €570 per worker, €650 for skilled workers and €800-1600 for supervisors. Companies are constantly modernizing their equipment in order to accommodate diverse trends and needs of their customers.

Due to the Free Trade Agreement with Russia, competitive prices of Serbian products have boosted furniture export – this year, furniture export to Russia has been increased by 50% if compared to 2013.

Besides agriculture and food industry, timber and furniture industry is the second most important sector in the country, and had a trade surplus of over €152 million in 2014. When it comes to the export structure, one half of exported products belong to the furniture industry and the other half comprises sawn timber and other wood products.

Over the past decade, Serbian wood industry highlighted the most attractive sectors for foreign investors. French Tarkett, Italian Ditre and Gruppo Fantoni, Austrian Kronospan and many others have built their factories in Serbia in order to supply not only the local market, but also the EU and the ever growing Russian market.

Forest Based Industry at a Glance

Timber and furniture industry is the second most important sector in the country, and had a trade surplus of over €152 million in 2014.

The average gross monthly salary is €570 per worker, €650 for skilled workers and €800-1600 for supervisors.
CHIGO CONTRACT

Chigo Contract Ltd. was founded in 2005. The main activity is production of furniture and equipment for HO.RE.CA., interior and exterior design, works on all types of furnishing restaurants and shops. We developed and protected our own brand of garden furniture – Chi Chairs.

Technologies
All products are manufactured to meet EU standards and the strictest quality criteria, tested at the University of Belgrade – Faculty of Forestry at the Institute of Testing the Quality of Furniture. All products possess a multi-year warranty for use in the hospitality industry.

Products & Services
We are producing and selling furniture for indoor and outdoor use - armchairs side chairs, barstools, benches, coat stands, tables (table bases and table tops), podiums and garden fences. For the season 2014 we developed Mediterraneo collection - metal furniture made of steel tubes and wooden panels (chairs, barstools, tables, benches).

Certificates
Certificate from the University of Belgrade Faculty of Forestry at the Institute of Testing the Quality of Furniture.

Collaboration Opportunities
Export, import, production.

DIV COMPANY

Initially founded in 1999, as DIV wood industry Vucetic, in 2005 company expanded its core business from production and sale of sawn wood to final processing of furniture, drying and steaming of sawn timber and production of parquet. In 2007 the company entered into a strategic partnership with the company “Chabros International Group” and became “DIV Chabros wood industry LLC”. This was followed with opening of a retail outlet in Loznica where you can find all of our products (flooring, lumber, firewood, pellets, furniture, etc).

Technologies
DIV Company combines advanced technology, cutting, drying and processing of wood. Our products of wood panel, doors and other interior elements were made with special attention to every detail to fit and finish and for every work we use only the highest quality materials.

Products & Services
Our products are sawn wood, parquet and flooring, panel, furniture, doors and windows, pellets.

Certificates
FSC – STD-40-004 V2.1 Chain of Custody(COC).
JUGOINSPEKT certificates about quality of pellets 03.32.24.

Collaboration Opportunities
Interest of our company is cooperation with potential partners in:
• investments in the production of furniture;
• the higher exports and finding larger international markets;
• higher sales and cooperation with more another different wood company.

GIR

Company GIR Ltd., established in 1993, is engaged in production and distribution of oak wood furniture, as well as launching projects in interior design and architecture. Since 2001, GIR has been producing massive oak furniture, wherein the entire production is placed worldwide via its foreign partner Ethnicraft (Belgium).

Technologies
GIR Ltd. possesses the most modern equipment for processing oak wood and furniture production, CNC machinery for highly precise operations, as well as high-quality surface protection.

Products & Services
GIR Ltd. is the leading exporter of massive oak furniture. GIR’s production range includes cupboards and sideboards, tables, chairs, office furniture, bedroom and anteroom furniture, as well as bathroom furniture.

Certificates
GIR Ltd. operates in accordance with the integrated quality management system, environmental protection, as well as occupational safety and health, that is, it has implemented standards ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007. The company also has introduced and established FSC CoC standard.

Collaboration Opportunities
GIR has its own technical and technological team to work on the newest softwares, as well as on development of new items. Using the most modern equipment leads to productivity increase and additional capacity for furniture production, which enables GIR to always be prepared to meet clients’ requests.

DUNAV APATIN

Our company was founded in 1946, and has been successfully producing kitchen furniture. Today we are focused on production of dining furniture. Our entire product range is exported to the German market, which means that we are fulfilling the standards of the European Union. The company employs about 45 employees.

Technologies
Solid wood processing, production of panel furniture, production of chipboard furniture, production of veneer furniture.

Products & Services
Product range includes: tables, chairs, corner benches and corner dining groups.

Certificates
In 2013 we acquired the FSC-COC certificate and FSC-C117097.

Collaboration Opportunities
The company cooperates with many manufacturers. All our endeavors are focused on the expansion of foreign markets in Austria and Russia.

HOOKL UND STOOL

HOOKL und STOOL is a new manufacturer and editor of contemporary design furniture, lighting and small objects. In every pure handmade piece we make, you can feel and enjoy in tradition of craftsmanship and experience we have in solid wood. As a design editor, HOOKL und STOOL carefully selects outstanding craftsmen and manufacturers of metal parts, hand woven textile and hand blown Bohemian crystal, combining it with the solid wood. We work exclusively with talented designers in order to provide quality, original and functional products for the high end, residential and contract markets.

Technologies
HOOKL und STOOL furniture is made of carefully selected sorts of solid wood as walnut, elm, cherry, pear and acacia. Our artisans use only natural waxes and oils for wooden finishing. Likewise, all other materials used for our products like upholstery, leather, fur, metal, glass and concrete, define supreme quality of handmade finishing.

Products & Services
The collection offers a range of seating, furniture, tables, lighting, occasional furniture, accessories and small decorative objects. HOOKL und STOOL is giving two years of warranty for solid wood part and other materials. With unique code for each piece, our clients are provided with the opportunity of online products tracking, in order to improve client-manufacturer communication and maintenance of the products.

Certificates
HOOKL und Stool used solid wood with FSC standard.

Collaboration Opportunities
HOOKL und STOOL aims at opening its collection to the new markets such as outdoor and contract. In order to achieve this, HOOKL und STOOL starts with new partnerships involving manufacturers and designers in keeping with the brand’s philosophy - combining artisanal craftsmanship with contemporary designs using both traditional crafts and innovative techniques, mixing solid wood with metal, glass, leather, fur, upholstery and concrete.

Company Matis Group is a young production company, founded in 2002. It has been derived from the mother company TIS Ltd. from Ivanjica. It is conceived on European standards in organizational and technical sense. Its production consists of serial production of chip-board made furniture, production of upholstered furniture, and manufacture of mattresses and pillows. With optimized safety and technical working conditions, high-quality commercial distribution and cooperation with other members of Matis Group in domestic and foreign markets, the success of company Matis is guaranteed.

Technologies
Following the demands of the market in quality, prices and quantities, technological system of Matis has been projected to meet the most complex demands. So flexible technological process allows the production of a large number of different products in smaller or larger series, with maximum productivity in both cases. Our complete production is made of digitally operated machines from renewed producers. Production system is integrated with transportation systems so the times of processing and extra times are minimized which leads to the maximum productivity in the furniture industry. The system is at this moment made of 4 production lines (3500 sqm), and it is annually renewed and supplemented by new machines of greater capacity and with higher degree of automation.

Products & Services
Main characteristics of Matis products are top quality, modern design, functionality and affordability. Their product lines include: kitchens, tables and chairs, hall units, shoe cabinets, commodes, TV stands, club tables, living rooms, wardrobes, beds, bedrooms, nightstands, toilet mirrors, children’s rooms and computer desks.

Certificates
To prove that quality we have the approval for all our products from the Faculty of Forestry in Belgrade. Our success is the result of the developmental strategy based on the usage of quality materials and modern technology in the production, as well as the highly skilled workforce.

Collaboration Opportunities
Looking for new customers-buyers and distributors, worldwide.

Company Rival Industrija was established in 1993 with the core business of designing and processing of iron and stainless steel. For the past years they have been involved in developing own products based upon customers’ requests, such as: folding furniture for homes and institutions, equipment for fitness and workout in open spaces, children’s appliances for playgrounds and amusement parks and wheelchair ramps for the disabled.

Products & Services
We want to introduce you our program of wall beds and butterfly tables:
• Space saving wall beds, such as:
  - The horizontal single, double and bunk beds;
  - The vertical single and double beds.
Material: iron rectangular tubes performed in electrostatic coating and Melamin faced chipboard - MFC.

Additionally, we offer the personalization of furniture by applying adhesive or printed images onto plane surfaces.
• Folding tables in many variations: butterfly tables, wall tables with two folding legs and desk drawer.

A lot of experiences have enabled us to constantly develop and improve our products, but also to work to satisfy the customers’ requests. We have tried to make every product unique in the market - by design, form, durability, technological solutions and at very reasonable prices for this type of product.

Certificates
ISO 9001, ISO 14001.

Collaboration Opportunities
Our company is seeking partners to represent our products in the EU or business cooperation.

Approvals of raw materials and final products.

Collaboration Opportunities
The possibility of increasing production capacity by 50% and the possibility of cooperation with new customers in new and existing markets. Main markets are: ex Yugoslavian republics, EU and Russian Federation. Company has extensive experience in equipping large facilities, like fully equipping of facilities for the Winter Olympics in Sochi.

Super Company Ltd. was founded 20 years ago. Two main production segments are: the mass production of high - quality furniture from chipboard material and manufacturing of steamed beech wooden beds.

We run equally successful dealership in supplying the market with various kinds of raw materials and semi - products, with particular emphasize to the production of scissors and lifting mechanisms for double beds and sofas.

Technologies
The production is precise and meets also the severest requirements of our customers, since there is continuous investment into new technologies. Also, our company implemented all the regulation and standards set by the European Union.

Products & Services
• Furniture from chipboard material (kitchens, living rooms, kid’s rooms, wardrobes, showcases, computer desks).
• Wooden beds of steamed beech.
Catra Home Fashion produces in a very friendly, even familiar atmosphere furniture in manufacture-quality. We are a manufactory of high quality upholstery furniture specialized in leather. Since our establishing in 2004, we export to the German market. Technologies Product development, R&D.

Collaboration Opportunities
We are interested in collaboration with niche market traders for exclusive furniture. Further we are able to do your design with private label.

CATRA HOME FASHION

Casa Italia Ltd. was founded 12 years ago with 100% ownership share of Italian capital, and later transferred into 80% ownership of Serbian investor. Models and design of furniture have been brought from Italy and workers have been trained by Italian experts. Casa Italia was founded in 2002, but commercial production started 2004. During that time, the main focus was on organising production, working on designs, training of employees and market research. Technologies Casa Italia Ltd. manufactures high-quality classic and modern leather and fabric sets, with wooden decorative elements. All materials used in production are of high quality and regularly certified. The structure is made of poplar and beech wood, and the final layer is the first-class Italian leather, and fabric. Products & Services The design of our products is intended for customers of different tastes: from the line of classic design, with wooden applications, gorgeous skin folds, decorative stitches – to modern furniture with straight lines and reduced forms. Sets are available in several variants, such as sofas, two seater sofas, as well as angular variations, small or large sizes, also includes individual pieces such as: armchairs , club sets, coffee tables and bar stools - more than 30 models. Also, it is possible to make of custom model series, on wholesalers demand, custom design and projects. Design was made by Italian designers and modelists, and it is such that Casa Italia has no rival in manufacturing classic and neo-classic models, in Balkan market. Not only that shapes satisfy the highest design and artistic criteria, but also the highest technological and ergonomic criteria. Collaboration Opportunities Today, our products are exported, mainly to Montenegro, Macedonia, Bosnia, Russia, Israel, but they are also sold in Serbia. We need buyers who will recognize our quality and possibilities, and designers and architects who need solid partners to collaborate on their projects of any public or other buildings.

All materials used in production are of high quality and regularly certified. The structure is made of poplar and beech wood, and the final layer is the first-class Italian leather, and fabric. Products & Services The design of our products is intended for customers of different tastes: from the line of classic design, with wooden applications, gorgeous skin folds, decorative stitches – to modern furniture with straight lines and reduced forms. Sets are available in several variants, such as sofas, two seater sofas, as well as angular variations, small or large sizes, also includes individual pieces such as: armchairs , club sets, coffee tables and bar stools - more than 30 models. Also, it is possible to make of custom model series, on wholesalers demand, custom design and projects. Design was made by Italian designers and modelists, and it is such that Casa Italia has no rival in manufacturing classic and neo-classic models, in Balkan market. Not only that shapes satisfy the highest design and artistic criteria, but also the highest technological and ergonomic criteria. Collaboration Opportunities Today, our products are exported, mainly to Montenegro, Macedonia, Bosnia, Russia, Israel, but they are also sold in Serbia. We need buyers who will recognize our quality and possibilities, and designers and architects who need solid partners to collaborate on their projects of any public or other buildings.

ĆIMO COMPANY

Ćimo Company was established in 1998. During first ten years our company was only oriented to retail, with three own furniture stores. In 2007 Ćimo Company expanded business to furniture production. Today our production facility has 6,000 sqm, we employ 100 people and produce more than 60 different products. We operate as manufacturers, wholesalers and retailers.

We try to differentiate ourselves by producing modern furniture, with high-quality and special attention to details. We use materials of highest quality, most important being fabric and leather from renowned German and Dutch manufacturers. Customer satisfaction is on top of our priorities, and we believe it is of highest importance for our success in the market.

Products & Services
We produce all kinds of upholstered furniture – sofas, corner sets, double beds, chairs, etc.

Certificates
FSC certificate, FSC-TUEV-COC-000645.

Collaboration Opportunities
We already export our products to majority of surrounding countries, and would like to find new customers in other European countries. Design of our products is very modern and we believe they are very suitable for European markets. We can also produce custom-made products for our customers with their own design.

PHILIP&CO FILIPOVIĆ

Quality above all is the motto of the family company Philip&Co Filipović from Sremska Mitrovica, established in 1979. We have produced wire spring cores for the needs of furniture and mattress industries since 1996. Our knowledge and experience in the area of production of spring cores for mattresses, together with our desire to offer our customers a better quality product in the area of furniture, were translated into a mattress production plant in 2007.

Over the years, the quality and diversity of products of our company have been proven on the markets of Serbia, European Union, Russian Federation, and surrounding countries. With constant improvement and development, we have become one of the leaders in the production of mattresses in our region. With the selection of raw materials of renowned Italian and world producers, in combination with the production technology of the latest generation, our company has been accomplishing better and better results and becoming renowned and recognisable for the quality of its products year after year.
